Mobile Phone:+90(539) 747-7377 ◇ Address:Istanbul, Turkey

E-Mail:btemel@sabanciuniv.edu ◇ LinkedIn:<https://www.linkedin.com/in/baris-temel/> ◇ Portfolio:<https://btemel.github.io/>

SUMMARY

Data Scientist with 6+ years of experience delivering AI/ML, analytics, and BI solutions in FMCG, fintech, and technology sectors. Skilled in building GenAI-powered applications, predictive modeling, and scalable projects. Strong cross-functional collaborator bridging business strategy with technical execution.

SKILLS

Software Languages	Python, SQL, R
Technical Skills	Machine Learning, Deep Learning, Big Data, Data Management
Tools	Azure Cloud Services, MS Copilot, Power BI & Tableau, Git, Docker, Jira, MS Office
Soft Skills	Prompt Engineering, Communication, Resilience, Public Speaking, Time Management

EXPERIENCE

Data Scientist & Governance Analyst The Coca-Cola Company

02/2023 - Present
Istanbul, Turkey

- Delivering Data Science & AI solutions for cross-functional teams across the EMEA region.
- Acting as the technical liaison between business stakeholders and development teams to ensure alignment on AI use case requirements, capabilities, and implementation.
- Technical Owner for several AI initiatives, responsible for translating business needs into technical solutions and guiding end-to-end implementation:
 - AI-Enabled Knowledge Hub: Lead the development of an internal Gen AI-powered tool capable of understanding and retrieving information from unstructured documents, delivering a conversational experience similar to ChatGPT.
 - AI-Driven Smart Narratives: Created insights from dashboards that generate automated, real-time business insights using Gen AI and predictive models, enhancing strategic decision-making, reduce time & effort to generate insights from days to hours.
 - Daha Daha AI Survey Insights: Designed an intelligent system to analyze large-scale open text consumer survey data, extracting key pain points, sentiments and trends to guide marketing strategy. Human insights can be created over weeks reduced to days with this insights tool.
 - Key Driver Analysis & Clustering Models: Built machine learning models for market segmentation and key metric attribution across top 40 countries, integrated into scenario planning tools.
 - Revenue Forecasting: Engineered an in-house time series forecasting solution on BIP (Business Integrated Planner), marking a first-of-its-kind initiative for the EME region.
- Developing and refining Gen AI applications using multiple LLMs, agent frameworks, focusing on vector search, recommendation engines, and integration of Plugins and Assistants into operational workflows
- Improving Coca-Cola Data Governance processes on EME OU over 25 countries. Responsible for the improvement & validation tasks of Nielsen, a leader in delivering marketing information.

Data Scientist
REEF

08/2021 - 05/2022
Miami, US

- Created data structures using REST APIs / SQL / Python.
- Developed Market Analysis by creating automated web scrapers in Python using state of art libraries such as BeautifulSoup, and Selenium.
- Developed and improved the back end of over 20 Kitchen Dashboards using Amazon Redshift Data Warehouse services.
- Analyzed sentiment analysis on partner delivery service platforms for executives.
- Architect and build Tableau Dashboards to achieve stakeholder needs for analytical model results.
- Responsible for designing and implementing BI solutions mainly to Kitchen verticals for Strategy and Operational KPIs.

Teaching Assistant
Sabanci University

09/2020 - 06/2022
Istanbul, Turkey

- Taught as an assistant for the introductory Python programming course IF 100 - Computational Approaches to Problem Solving.
- Managed to teach up to intermediate-level concepts on coding to freshman students in one term for about 14 weeks.

Data Analyst
QNB Finansbank

03/2019 - 06/2020
Istanbul, Turkey

- Management trainee: Trained financial and leadership skills, Python, SQL, and Excel training, and finished a project about credit card fraud detection.
- Analyzed raw data about financial concepts, creating algorithms and models in both Python and R gathering and exporting data using SQL, automating reports, and creating a visual platform in Visual Studio using C# and SQL, experiencing in creating different dashboards and making financial data analysis.

EDUCATION

Masters of Science - MS, Data Science, Sabanci University

- Relevant Coursework: Machine Learning, Deep Learning, Big Data Processing, Deep NLP, Computer Graphics, Methods of Statistical Inference, Engineering Optimization, Advanced Statistics with R
- GPA: 3.50/4.00

Bachelor of Industrial Engineering, Sabanci University

- Relevant Coursework: Statistical Modelling, Deterministic & Stochastic Models in Operational Research, Financial Engineering, Decision Analysis, Simulation, Differential Equations, Supply Chain Practice, Quality Planning & Control, Decision Economics, Microeconomics
- GPA: 3.01/4.00

PROJECTS

Follower Anomalies in Social Media: This is my thesis project. The motivation is to create an open-source algorithm that detects anomalies of followers in any social media. Twitter is my base target social media. You can read the full thesis from this [url](#).(Sabanci University 22')

CERTIFICATIONS

- **Certified Scrum Product Owner (CSPO)** by Scrum Alliance
- **Data Scientist** by Datacamp
- **AI Engineer for Data Scientists Associate** by Datacamp
